DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-31, drawn to a detection system for a bio-separation device having a separation channel, classified in class 422, subclass 50.
 - II. Claims 32 and 33, drawn to a method for detecting analytes in a bio-separation device having a separation channel, classified in class 250, subclass 459.1.

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus as claimed can be used to practice another and materially different process such as light scattering assay.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for one group is not required for other restriction for examination purposes as indicated is proper.

A telephone call was made to Wen Liu on November 30, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1641

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
